ACOUSTIC ENERGY

The Neo V2 is the latest incarnation of the ever-popular Aegis speaker series.

Featuring a much improved finish with new vinyl wrap, magnetic grilles and new driver chassis. The Neo V2's also include changes to the crossover and motor assemblies, further improving acoustic performance.

The Aegis Neo's have always been extremely competitive in the entry-level Hi-Fi sector - receiving many accolades from the press and public alike. With the V2 improvements in clarity and dynamics the Neo's look set to remain class leaders for a considerable time yet...

Technology

The Neo Series takes its name from the use of Neodymium, a highly linear magnetic material that offers superior power handling and far lower distortion than traditional ferrite magnet drivers.

The original Neo series was the world's first affordable loudspeaker range to feature all-Neodymium drivers throughout.

The "Ring-Radiator" tweeter utilised throughout the range is an advanced design selected for its wide bandwidth, low distortion and ruler-flat frequency response up to 45kHz.
