

# ELECTRA SR 1000 BE

## Product Data Sheet

Not much evolution for the SR 1000 Be that benefits from the 'W' cone. But its exclusive "Bi/Twin" structure with dual input permits to use the SR 1000 Be as well as in a 5.1 system (bipolar mode) as in a 7.1 (twin mono mode) without increasing the number of effect loudspeakers in the Home Theatre room.

Bi/Twin mode selection

### Key points

- Made in France loudspeakers and drivers
- High size/performance ratio for optimum integration

Type	2-way sealed bipole/twin mono effects speaker
Drivers	Two 6 <sup>1</sup> / <sub>2</sub> " (16.5cm) 'W' midbass Two 1" (25mm) pure Beryllium inverted dome tweeters
Frequency response (+/-3dB)	72Hz - 40kHz
Low frequency point (-6dB)	59Hz
Sensitivity (2.83V/1m)	91dB
Nominal impedance	4-8Ω
Minimum impedance	3Ω / 6Ω (bi/twin)
Crossover frequency	2,400Hz
Recommended amplifier power	40 - 200W
Dimensions (HxWxD)	15 <sup>3</sup> / <sub>8</sub> "x17x7 <sup>1</sup> / <sub>2</sub> " (390x430x190mm)
Net weight	27.7lb (12.6kg)
