Introducing elegante

At Mission we understand the importance of sound reproduction in home entertainment and the increasing role music and movies now play in our lives. Today's listeners demand more than just sonic performance from their loudspeakers, they also desire styling to suit their living environment.

Mission's *elegante* range consists of three unique loudspeaker systems, each carefully sculptured and acoustically engineered to a remarkable standard of excellence. All systems have been crafted to perform as well in multi-channel as in two-channel stereo to suit all DVD, SACD and CD formats. Strongly influenced by the gently flowing curves and understated grace of Mission's flagship Pilastro, all *elegante* loudspeakers feature a streamlined profile to optimise sound dispersion. Seven layers of highly polished lacquered anthracite provide a luxurious finish to complement the décor of any room in the home. All three *elegante* systems will be available in a 6.1 home theatre configuration, with a simple option to upgrade to additional channels. Comprising six stylishly profiled loudspeakers and a powerful subwoofer, each system will effortlessly deliver all the thrills, excitement and emotion accompanying the latest CD, DVD, DVD-Audio and SACD releases. Mission's *elegante* systems offer the ultimate in luxury sound and style for those who share our passion for audio.

C80 system

The e80 system is the smallest system available in the *elegante* range, consisting of five bookshelf e80 loudspeakers, an e8c centre channel and a compact 350W subwoofer. A rigid wall bracket is supplied with each of the e80 satellites for wall mounting; however, it can also be used to lock the speakers onto a specially designed *elegante* floor stand (a pair is supplied with system). The e8c can either be wall mounted using the supplied bracket or simply positioned underneath a plasma screen on an equipment rack. Finally, the e8as1 subwoofer is cuboid in design and matches the rest of the system. All are finished in stunning anthracite finish with black cloth grilles.

C82 system

Ideal for medium or large-sized rooms, the e82 system consists of two slim-line e82 tower loudspeakers, three bookshelf e80 loudspeakers and an e8c centre channel, plus the e8as1 compact subwoofer. Each e80 is supplied with a wall bracket that also fits onto an elegant floor stand*. The e8c can either be wall mounted using the supplied bracket or simply positioned underneath a plasma screen on an equipment rack. For enhanced bass performance the e82 system can be upgraded by replacing the 350W e8as1 with a 500W e8as2 subwoofer. All are finished in exquisite anthracite finish with black cloth grilles.

C83 system

The largest of the *elegante* systems is the e83 system featuring two tall and elegant e83 tower loudspeakers, utilising two 165mm bass/mid drivers and three 165mm ABRs. These are magnificent stereo speakers in their own right, and are complemented by three e81 bookshelf loudspeakers and a stylish e8c centre channel. Each e81 is supplied with a wall bracket that also fits onto an elegant floor stand*. Finally, a 500W e8as2 subwoofer featuring four Pilastro-type bass drivers provides incredible LFE performance. All are finished in appealing anthracite finish with black cloth grilles.

Note: The recommended amplifier power rating is for undistorted power. Loudspeakers will be damaged by amplifiers overdriven into distortion, no matter what the power rating of the amplifier. For larger rooms or high listening levels it is safer to choose an amplifier with a power output near the maximum rating of the loudspeaker.

Recommended Amplifier:	50 - 150 W	
Enclosure:	2-way sealed box	
Frequency Response ±3dB:	80 Hz - 30 kHz	
Sensitivity SPL/M @ 2.83V:	90 dB
