

User-friendly tuner provides convenient tuning functions and a high visibility, two-line display — with Yamaha's new HiFi component design that matches other new product series.

Advanced Features

- 40-station AM/FM preset tuning
All 40 stations can be accessed with two turns of the rotary encoder knob, after which it stops. Favorite stations can be set at either end for greater convenience.
- Auto FM station memory
Auto FM Station Memory automatically presets the 40 strongest FM stations on the dial so you don't have to select and preset them manually.
- Multi-status station memory
Thanks to Multi-Status Station Memory, each station memory includes the parameters set when it was memorized, for optimum

quality each time it is selected.

- 2-line, 16-character (5x7 dot matrix) display
This high and wide display offers better visibility than previous types (1-line, 11-character displays). It provides a larger amount of more precise information, making the tuning operation easier.
- Auto search and manual tuning
- Radio Data System broadcast reception (European model only)
You can receive the following Radio Data System information: PI (Program Identification), PTY (Program Type) Seek and TP (Traffic Program).

2-Line, 16-Character (5x7 Dot Matrix) Display

Silver finish available in some areas.
